OUR ERP BUSINESS FLOW

Technologies Used

Platform	: Microsoft .NET
Programming Language	: C#
Database	: SQL Server
Reporting Tool	: Crystal Reports

Data Security

We use Microsoft SQL Server database for this application software which provides extreme level of data security as well as three tiers of authentication at server level and database level. In the application too, we use highest level of security. Furthermore, with scheduled data back-up the chances of data loss are almost zero.

Educational Mode

We provide online demonstration, face to face discussion, user manuals, trainings for the end users of the software package.

A top-down view of a person's hands typing on a silver laptop keyboard. The person is wearing a beige sweater with white cuffs and a black smartwatch on their left wrist. They are also wearing rings on their fingers. On the desk, there is a black pencil, a smartphone with a marble case, and a small green air plant in a black pot. A large red circle is overlaid on the left side of the image, containing the text.

Database Support

We will provide database support for the software users. If required, we can arrange for dedicated highly skilled back-end support resources for instant production level issue solving to ensure smooth running of all the operations.

Key Benefits

Here are some of the key benefits that our ERP software offers –

- 01 Our software has been designed to perform as per the current industry standards
- 02 Our ERP software offers round-the-clock protection to keep your business data safe and secured.
- 03 We offer the best solution for managing day-to-day processes.
- 04 Our Software interface prioritizes usefulness and usability, which ultimately lead to benefits for the business.
- 05 Our ERP solutions help you have increased performance and high profitability.
- 06 Last but not the least, we build software which are highly cost effective and save valuable time for our esteemed customers.

Thank You
